

*The Little Sisters invite you, your family, friends and students to meet and hear Sister Lorraine Lauter, OSU, Executive Director of **Water With Blessings** speak about this global water filtration project, based in Kentucky. Since 2015, WWB has partnered with the Little Sisters to bring industrial size water filters to LSP Homes on the African continent and Peru (we're planning for India, Sri Lanka and South America later this year) - all thanks to a generous benefactor. Beginning in 2007, WWB has "put state of the art water filters into the hands of more than 25,000+ mothers in 30 countries, training them to provide clean water - not just for their own families, but for others in the community as well. Passionate about health for their children, dedicated, determined, and generous in spirit, these "Water Women" became our "state of the heart" solution."*

Saturday, March 11th at 1:00 p.m.

**St. Joseph's Home for the Elderly auditorium
80 W. Northwest Highway, Palatine, IL 60067
a one hour interactive presentation**
